

Gulf Coast Paint Mfg.

Providing Asset Protection for Mining Companies

Gulf Coast Paint provides protective coatings that are chemical and abrasion resistant for the Mining industry. Our full line of high performance coatings meets the challenges. From salt mines to coal mines, we have the coatings to deal with the corrosion that can pose a serious safety risk.

From general purpose epoxies to polyester polyurethanes, we have the products to protect all structures & equipment in plants & refineries:

- Process Equipment
- Locomotives & Wagons
- Floors & Walkway
- Pipes
- Silos
- Processing Tanks

KEY SYSTEMS USED

DRAGLINE

CM-15 Epoxy Mastic (2 coats)
CT-352 Polyester Polyurethane
(1 coat)

*This system was used with a finish coat of Polyester Polyurethane which provides excellent UV retention, gloss retention and abrasion resistance.

NON-SKID FLOORING

PC-636 Fast Drying Epoxy (1 coat)
PC-650 Non-Skid Epoxy (1 coat)

*PC-650 has an aggressive Anti-Slip profile that helps provide safer footing and traction on concrete and steel surfaces in exterior and interior environments.

NOTE: Passes OSHA & ADA's required Co-efficient of Friction.

TANKS

PC-2.8 Quick Dry Primer
(1 coat)
PC-517 Cyclo-Aliphatic Epoxy
(2 coats)

*This system provides a quick drying primer (2-3 hrs at 75°F) followed by 2 coats of our high end Cylco-Aliphatic Epoxy Mastic that provides outstanding chemical and abrasion resistance.
