

# GULF COAST PAINT MFG., INC.

## WASTE & WASTEWATER SOLUTIONS

### Key Products: **PC-517 & PC-590/591**

PC-517 is a high performing two component, high solids, high build, Cycloaliphatic polyamine cured Epoxy Mastic that can be used as a One Coat 20 mil dry film epoxy on vertical surfaces. This unique coating has excellent chemical, abrasion, impact and weather resistance with outstanding adhesion to marginally prepared surfaces.

PC-590 is a 100% solids, two component Cycloaliphatic Epoxy Mastic Coating. PC-590 provides very low permeability along with excellent impact and abrasion resistance. Formulated with a unique moisture **insensitive** polymer, PC-590 may be applied on wet surfaces or underwater without effect on cure. PC-591 is a lower viscosity version of PC-590 that can be brushed and rolled.

#### **PC-590/591**

- 100% Solids - No odor
- Self Priming
- Can withstand H2S
- May be applied underwater
- Cures down to 45°F

#### **PC-590/591 is Designed For**

Wastewater Facilities, Lift Stations, Pulp & Paper Mills, Sweating Pipes, Chillers, Clarifiers, Dams, Fertilizer Plants, Pilings, Cooling Towers.

#### **PC-517**

- 
- 92% Solids – Low odor
  - Self priming
  - Can withstand H2S
  - May applied on damp surfaces
  - Cures down to 40°F (Low Temp Hardener cures down to 25°F)

#### **PC-517 is Designed For**

Chemical Processing, Wastewater Facilities, Mining Sites, Electric Generating Facilities, Clarifiers, Electric Generating Facilities, Bleach Plants, Refineries, Tank Linings.
