

GULF COAST PAINT MFG., INC.

PC-270 NON-YELLOWING POLYESTER EPOXY

BEFORE

AFTER

PRODUCT USES

PC-270 is used to coat walls, ceilings, equipment, machinery, tanks, vessels, piping and structural steel in the following areas where a high performance Non-Yellowing finish is desired:

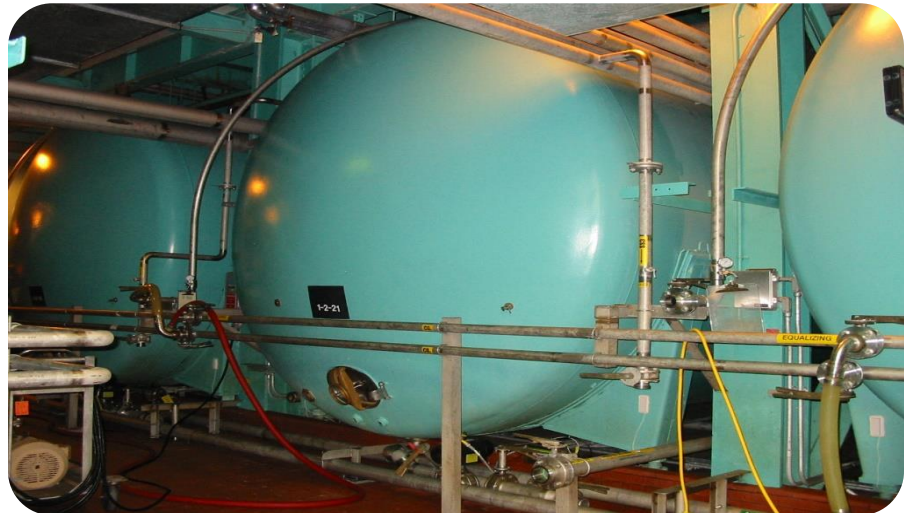

- *Industrial
- *Institutions
- *Commercial

PRODUCT FEATURES

- *White & pastel colors are non-yellowing
- *Exceptional weathering and color retention
- *Beautiful High Gloss tile-like finish
- *Excellent chemical and abrasion resistance
- *Easy to clean
- *Excellent as an anti-graffiti coating
- *Meets USDA requirements for use in food processing plants

PRODUCT DESCRIPTION

PC-270 is a uniquely formulated Non-Yellowing, two component, polyester epoxy coating. PC-270 uses specially selected polymer resins to produce a hard, high gloss tile-like finish. PC-270 provides outstanding wash and scrubability, making it ideal as an anti-graffiti coating and for surfaces exposed to great abuse. PC-270 is recommended as a coating for properly primed masonry, steel, aluminum and galvanized surfaces.
